PCR Nasal swab testing

Our private COVID19 RT-PCR test detects viral RNA from your nose and the back of your throat. This is the most accurate and reliable test. The test involves taking swabs and then analysing the specimen, our specimens are analysed in a fully INAB accredited Dublin lab (Eurofins Biomnis). All tests are carried out by a qualified clinician.

- The cost of the private PCR test is €125.00. (Discounts available for bookings of 2 or more).
- **THIS IS THE MOST COMMON TEST FOR INTERNATIONAL TRAVEL AT PRESENT.**
- **THIS TEST IS NOT FOR SYMPTOMATIC PATIENTS.**
- Turnaround time is 48-72 hours.
- Results will be sent directly to your email address as a PDF attachment.

(Please note we are required to report any positive COVID19 results to the Dept of Public Health)

We would like you to note:

1. Appointments can be made by emailing us on reception@grangeroadfamilypractice.com or calling us on 01-4957758.
2. You do **NOT** need a referral for this test.

IMPORTANT INFORMATION

- It is the patient's responsibility to check travel requirements of the airline and country you are travelling to, as well as ensuring your results will be received in the correct timeframe required by the airline and country.
- While tests results will usually come back within 24 hours, we ask that you book 48 – 72 hours before travelling to avoid disappointment. We cannot be held liable for any knock-on implications (eg missed flights) should timescales be longer than those advertised.
- Your result can be affected by the following: an unexpected positive result, a false positive result, the lab deeming the sample insufficient and an 'indeterminate result' being issued, a mislaid or misprocessed sample, an IT failure. None of which are within our control – Grange Road Family Practice cannot be held liable for this. A failure in the process that is out of our control will not lead to a refund of fees paid.
- Our fee of €125 includes the COVID19 PCR swab test result (fit to fly certificate) being sent to your email address as a PDF attachment. This is usually sufficient for airline and visa purposes. If an additional signed letter is needed from our GP, this will incur a €10 fee.

- We **cannot do a PCR** test on you if:
 1. You are not following current Irish Government travel rules
 2. You have Covid symptoms currently or have been diagnosed with the past 10 days.
 3. You have been identified as a 'Close contact' of a COVID case.
 4. Your GP has already referred you to the HSE for a Covid swab test.

Patients under 16 must be accompanied to their appointment by an adult (parent/guardian).

We require photo I.D. (which must be either a current Passport, Drivers Licence or Irish Public Services card). You must either bring it to your appointment or be able to provide a digital copy. We will be unable to release your result until this has been provided.

Please sign this form to confirm you have read & agree to the above terms and conditions.
